

# **KOSHA – Ulsan Center for Creative Economy & Innovation**

## **Host the 2nd New Safety Technology Contest**

- KOSHA and Ulsan Center for Creative Economy & Innovation (Executive Director: Young-hae Gweon) host the 2nd New Safety Technology Contest to support small-and-medium-sized enterprises armed with new technologies in the field of safety.
- Through this upcoming contest, KOSHA and Ulsan Center aim to help the enterprises growing further by offering consultation on technical development and supporting the expansion of markets and eventually to realize social values, including creation of jobs.
- Eligibility for the contest will be given to venture companies and small-and-medium-sized enterprises with not greater than 7 years of existence as well as potential startup companies engaging in new technologies (including information technology) concerning products or services related to industrial safety, disaster prevention and fire safety.
  - At the same time, small-and-medium-sized enterprises of 3 years or less from the certification date of safety-related new technology development will be eligible for the contest.
- The maximum of 10 teams (companies) will be selected, and the winners will be entitled to a total of ₩33 million prize money, including ₩10 million for the grand prize, mentor programs with experts, technical development funds and opportunities to participate in the International Safety and Health Exhibition.
